

Manage Risk & Ensure Occupant Well-being

- Test Baseline IAQ
- Clean & Restore HVAC
- Reduce Particles
- Neutralize Pathogens
- Clean The Air
- Monitor IAQ 24/7
- Certified Healthy Building

Helping you get back to business in the safest way possible!

While many businesses and institutions are still waiting for the COVID-19 pandemic to subside before heading back to their offices, Pure Air Control Services is leading the way by helping organizations implement environmental best practices to manage risks and get people back to work safely.

Our **Certified Pure Air Indoor Environment** program optimizes and maintains building health. It's a holistic program that utilizes a suite of engineered services to effectively neutralize harmful particles and pathogens while continuously monitoring the ambient conditions.

From environmental coronavirus testing to HVAC system and room disinfection Pure Air Controls can help your buildings and occupants stay healthy and productive!

Whether you have a specific need or would like to get certified, we can help!

HVAC CLEANED & RESTORED:

All of the HVAC units are hygienically cleaned with PURE-Steam™ using 350° F steam. Then restore them with anti-microbial paint as part of the HVAC New Life™ process.

PARTICLES REDUCED:

All of the supply & return ductwork is hygienically cleaned with the PURE-Duct service incorporating negative air machines with HEPA filtration. Fiberglass ductboard is also encapsulated to prevent degradation.

PATHOGENS NEUTRALIZED:

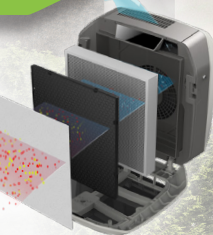

PURE-Decon building disinfection is conducted using EPA registered disinfectants to neutralize all bacteria, mold & viruses (including coronavirus) prior to the facilities being certified.

IAQ BASELINE EVALUATION

Baseline environmental (including for COVID-19 or Coronavirus) and HVAC testing is done to verify building safety.

AIR PURIFICATION:

Air purifiers with EnviroSmart™ detection technology & multi-stage HEPA filtration and/or PURE-Plasma bi-polar ionization are installed in the building for the continuous cleaning of the air to remove allergens, microbes, odors & particles.

CONDITIONS MONITORED:

IAQ Guard is installed to monitor/alert the facility 24/7 for particles, temperature, rH, CO2 & VOC.

3 Specialized Divisions

Indoor Air & Environmental Testing

A comprehensive field and laboratory analysis to determine the biological conditions and performance of a building.

- Contaminant Source & Risk
- Allergen, Bacteria, Mold & More
- Wall & Floor Moisture
- Temperature & Humidity
- Envelope Test & Balance

Cleanliness & Performance Verification

Evaluate the mechanical inventory to prioritize maintenance, restoration and replacements for optimum IAQ and energy efficiency.

- Physical Condition Inspection
- Environmental Analysis
- Airflow & Energy Testing
- Duct Leakage Evaluation
- Pressure & Tightness Testing

SARS-CoV-2 Validation & Clearance

This surface sample RT-qPCR testing method provides assurances for risk assessment, infection prevention and control measures.

- Detects Virus Presence
- Supports Action Planning
- Monitors Disinfection Programs
- Provides Clearance for Occupancy
- Assures Occupants of Safety Measures

HVAC AHU & Coil Cleaning

Thorough deep sanitization utilizing high temperature and low pressure steam along with pre and post bio-enzyme coil treatments.

- Coil Cleanliness Verification
- Improves IAQ & Performance
- Increases Energy Efficiency
- Reduces Work Orders
- Extends Equipment Life

Extends Equipment Life • Saves Energy

HVAC New Life is an innovative hygienic restoration service that ensures a longer lifespan and optimal performance for aging HVAC system component such as:

- Air Handling Unit Cabinets
- Evaporator Coils
- Blower Motor Assemblies
- Drain Pans
- Structural Rails

Hygienic Duct Cleaning

Mechanically engineered and certified methods for total air conveyance system cleaning including VAV and Reheat terminal boxes.

- Reduces Bacteria & Mold
- Removes Dust & Particulates
- Improves Airflow & Ventilation
- Minimizes Allergy & Asthma Attacks
- Reporting & Certification

Multi-Level Disinfection Program

A suite of decontamination services engineered to the environmental situation, building type/use and HVAC system configuration.

- 5 Levels Based on Project Need
- Disinfectants for Emerging Pathogens
- Electrostatic Spray Applications
- Deep Cleaning Wipe & Vacuum
- Reporting & Certification

Bipolar Ionization

Technology produces a natural bio-climate rich in positive and negative oxygen ions for a self healing building.

- Powerful plasma ionization technology
- Aerosols oxidize on contact with bipolar ions & are neutralized
- Control Chemical & Voc Gases
- Destroys airborne pathogens & viruses
- Continuous air purification

Air Purification

Filters air at the source of the contaminant. The units are designed to seamlessly integrate into your facility's environment, mounting easily on any wall.

- Multi-Stage HEPA Filtration
- Anti-Microbial Treated Filters
- PlasmaTrue Bipolar Ionization
- EnviroSmart Detection
- Low Noise & Energy Efficient

Real-Time Monitoring Program

Remote monitoring of specific IAQ parameters that reports to our Building Sciences team your facilities staff via a browser-based dashboard.

- Continuously Evaluate IAQ
- Establish IAQ Standards for Operations
- Monitor Changes & Fix Problems
- Ensure Compliances with Reporting
- Reduce Project/Building Liability
